

ARTER

PRECISION GRINDING MACHINES
a brand of Obsidian Manufacturing Industries, Inc.

CAPABILITY STATEMENT

Brand Overview - For over a hundred years, Arter grinders have been the forefront of superior surface grinding. As the Original Equipment Manufacturer (OEM) of all Arter and Sundstrand-Arter grinders, we are your single source for the complete line of spare parts, service and new Arter models. Over 5,000 Arter grinders have been built and many of them are still producing high quality products for their owners. Today's generation of CNC Arter grinders are made to provide a more rigid and stable machine to obtain better finishes, flatter, and more parallel surfaces, as well as automatic production cycles to obtain higher levels of productivity.

MANUFACTURING - The CNC Model E is the current generation of Arter Precision Rotary Surface Grinders that we manufacture in our Rockford, IL USA factory and sell direct. It is available in 24", 30" and 36" table sizes. Since 1914; smooth, concentric surface finishes have been synonymous with Arter grinders; our extensive historical engineering records contain information to service all Arter Grinders.

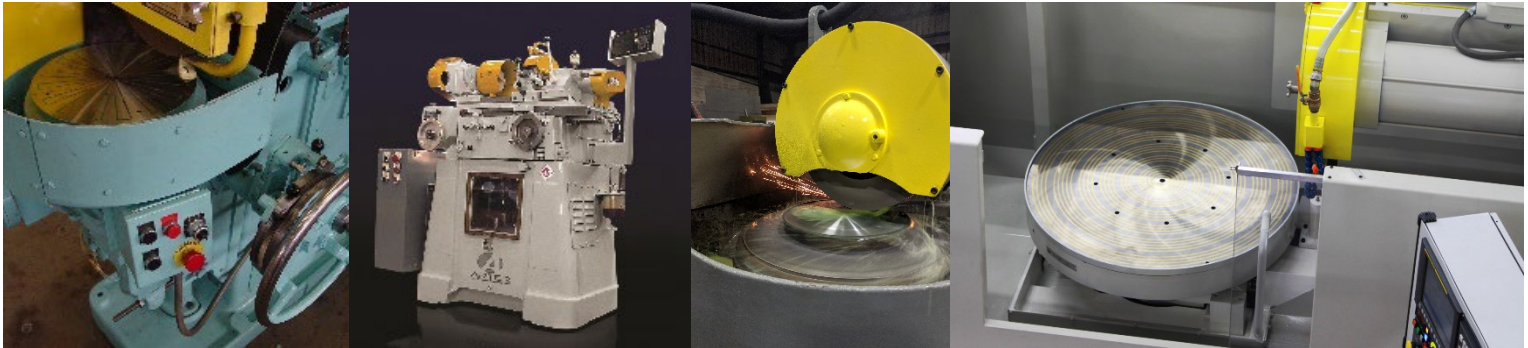

REMANUFACTURE - We repair, rebuild or retrofit our products.

FIELD SERVICE AND OEM SPARE PARTS - We offer field service for all models of Arter Grinders. Because we own all intellectual property and proprietary rights to the Arter brand, we are your exclusive source for authentic, genuine Arter Grinder replacement parts.

BUY/SELL USED ARTER GRINDERS - We are developing a network of Arter Grinder users that have spare machines that they would like to sell. Most of these customers do not want to see the machine scraped so they contact us in hopes of someone else wanting the grinder. Once we agree to purchasing their machine, we move the machine to our factory and perform testing and evaluation on the machine based on the quality assurance testing established at the time of manufacture for that model. Once the evaluation and any repairs are completed, we resell it to a customer in need.
